Each powered wheelchair can cost as much as £6,000 and will be custom made for each youngster according to their needs, even the colour can be at their request.

CHIPS is funded almost exclusively by the Gaming Industry here in the UK and over the years has raised a staggering amount in excess of **£1,000,000**.

CHIPS will never offer a powered wheelchair to a youngster unless the funds are "in the bank" and each application has been thoroughly researched.

CHIPS is registered under the auspices of the Charities Aid Foundation, who administer all our funds and the **CHIPS** committee take no salary or expenses. Every penny raised goes to provide the powered wheelchairs that enable the recipients to have the mobility, independence and dignity which is the right of every child.
